

Nite Ize MoonLit LED Micro Lantern Clips, Swivels & Shines

BOULDER, Colo., Jan. 6, 2016– A versatile lighting solution without the bulk of a traditional lantern, the new [MoonLit® LED Micro Lantern](#) introduced today by Nite Ize® can clip, swivel and shine. This Colorado company is most well-known for its innovations that enhance user lifestyles and the MoonLit LED Micro Lantern does just that.

“The concept of a small, glowing area light is not new to Nite Ize,” Rick Case said, CEO and founder of Nite Ize. “We perfected this idea with our [SpotLit®](#) and now we have enhanced it with the launch of the MoonLit LED Micro Lantern. This little light has the ability to attach anywhere and be positioned at any angle which makes it a must-have if you’re looking for hands-free illumination within arm’s reach.”

Featuring a secure carabiner at the top, the micro lantern can be attached to a zipper pull, clothing or tent loop allowing it to hang, providing ambient lighting and convenient hands-free use.

The bright LED is easily turned on or off with a squeeze; it can also be set to glow or flash mode depending on the use. The lighting module swivels for 360 degrees of illumination.

With a battery run time of 60 hours, the MoonLit LED Micro Lantern is a long-lasting lighting companion.
