

Small Size, Big Light: New Radiant Series Lanterns Available from Nite Ize

BOULDER, Colo., July, 26, 2017– Using designs and materials in ways never seen before, Nite Ize® pushes the limits of innovation to create accessories that are not only unique but useful. Their latest innovations in compact lighting include the Radiant® 200 Collapsible Lantern + Flashlight and Radiant 100 Mini Lantern.*

The [Radiant 200 Collapsible Lantern + Flashlight](#) packs a powerful one-two punch providing 200 Lumens of brightness in an impressively compact and durable body. This versatile lighting tool handles all illumination needs and uniquely functions as a traditional lantern, lantern and downlight combination, or handheld flashlight. The convenient carabiner handle allows the lantern to be clipped, carried or hung just about anywhere and, when hung in lantern and downlight combination mode, provides all-around area lighting without casting a shadow below the lantern. As the name implies, the Radiant 200 can be collapsed with an easy sliding motion which transforms it into a convenient handheld flashlight or simply into a more compact size for packing and storage. Powered by four AA batteries giving it more than a six hour run time on high, plus being water and impact resistant, this collapsible lantern plus flashlight is great for both indoor and outdoor lighting. MSRP \$29.99.

The [Radiant 100 Mini Lantern](#) boasts 100 Lumens and features a soft silicone dome that squishes down when packed or compressed. The multi-mode push button activates both high and low white LED modes as well as a red LED mode. It also features an integrated two-position carabiner clip that can be conveniently hung from the middle as a down-light or from the side, flat against a wall. Both water and impact resistant, this little lantern is ideal for any adventure. Powered by three AAA batteries, the Radiant 100 will run on high for up to eight hours. MSRP \$15.99.
